

**Australian Organisation for Quality
Monthly Discussion and Networking Evening
Thursday 26 August 2010**

You and your colleagues are cordially invited to our next presentation

Drago Mlinarevic, Director Certification Programs, will speak on:

HACCP – interface with Regulatory requirements and management systems.

Hazard Analysis Critical Control Points (HACCP) is the main platform for international legislation and good manufacturing practices for all sectors of the food industry. HACCP also forms a key component of many certified compliance standards and is recognized as a main element of international trade in food products.

HACCP is relevant to all sectors of the food industry, including primary producers, manufacturers, processors and food service operators who want to demonstrate their compliance with national or international food safety legislation requirements.

Are you interested in knowing how to provide safe food for yourself and your customers? Would you like to know more about integrating your management system to assure compliance with regulatory requirements?

Join us at this forum to learn more about food safety and the interface with Regulatory requirements and management systems.

About our speaker -

Drago Mlinarevic, DQS Director Certification Programs has developed and implemented Management Systems for water and electricity utilities, manufacturing, retail, and service industries, including recruitment and flexible packaging organisations.

In the food industry, Drago has developed HACCP based foods safety management systems for bakeries, fast food retailing, school canteens, seafood processing, seafood and meat wholesale, food packaging manufacturers and restaurants.

Drago is managing Regulatory Compliance Program for Victorian Government and HACCP Certification for food industry.
